

## FAQs

### 1. What is the Undergraduate Summer Research and Artistry Fellowship Program?

The program provides outstanding College of Liberal Arts and Sciences (LAS) students with the time, financial support, and faculty mentorship necessary for in-depth work on a research or artistic project related to a senior thesis or capstone project (broadly defined). The program awards \$4,500 summer stipends to cover basic living expenses while doing research or artistic activity.

### 2. Am I eligible?

The award is for full-time undergraduate LAS majors with junior status by the end of Spring '23. Students with senior status can apply if enrolled full-time for Fall '23. Awardees must be able to devote full-time effort to research or artistic activity for at least 9 weeks during the summer.

For detailed information visit:

<https://www.bradley.edu/academic/colleges/las/research/>

### 3. What types of projects are awarded?

Projects can come from any department in LAS. A sampling of activities includes scientific laboratory work, field research, literary or philosophical analysis, cultural studies, interviews, media studies, creative writing and poetry, software design and/or application, survey research, mathematical work, archival research, and translation work.

Class projects, independent readings, or independent studies can serve as springboards for the summer fellowship.

### 4. How do I find a professor to serve as the project mentor?

Talk to a professor whose course you enjoyed. Look at your department's website and find faculty research or creative work that seems interesting to you. Ask your advisor or department chair for recommendations. If you are already working on a project with a faculty member, ask if they can continue guiding you over the summer as your mentor.

### 5. How are awards decided?

An award committee composed of faculty from multiple disciplines in LAS makes the decisions. The committee looks for proposals that are written in a way that a non-specialist can clearly understand (a) why the project is important within your field and (b) the specific work you will do on the project during the summer months. The committee also looks for a timeline that will specifically and reasonably mark progress on the project over the summer.

The mentor's letter of support should be clear and definite. It should address the quality of your project and your promise for successfully completing it. Make sure that your mentor is familiar with your project.

The evaluation rubric is available at the end of this document.

**6. How do I apply?**

Submit a 5 page proposal along with a letter of support from your faculty mentor.

Submission instructions along with full guidelines and procedures are available at the LAS website <https://www.bradley.edu/academic/colleges/las/research/>

Materials must be submitted by **March 10<sup>th</sup>, 2023 at 5 pm.**

**7. If I still have questions, who should I contact?**

Feel free to contact Dr. Aurea Toxqui ([atoxqui@fsmail.bradley.edu](mailto:atoxqui@fsmail.bradley.edu)), Bradley Hall
