

Forensic Internship Program (FIP)

The National Forensic Science Technology Center (NFSTC) located in Largo, Florida, exposes Cadets to biometric and forensic capabilities. During a two week training period, Cadets would be exposed to and taught how to examine fingerprints, tire tracks, and footwear impressions, as well as explosives detection, chemical analysis, media exploitation, IED investigation, and deployable forensic laboratories and capabilities. The training will consist of mandatory lecture viewing via podcasts prior to the Cadet's arrival at NFSTC. Upon arrival at NFSTC the knowledge delivered via the podcasts will be taught in a hand on manner in the NFSTC laboratories and facilities.

Location:

Cadets in FIP will serve in Largo, Florida at the campus of the NFSTC.

Prerequisites:

1. Enrolled Forensic Science or Criminology Program or planning on branching MP or Engineer.
2. Meet current APFT and height/weight standards at the time of application and during attendance.
3. GPA of 2.5 or better in academic major.
4. MS III Cadets have priority. However MS IV Cadets graduating December or later may apply as an exception to policy.
