Master Planning of Resources APICS Exam Preparatory Course

Who should attend:

Production and inventory management personnel, those wishing to achieve the APICS Certified Production Inventory Management (CPIM) designation, and those seeking professional development points to maintain their current credentials.

Course Description:

This 8 chapter review course will prepare students to take the Master Planning of Resources APICS exam, 1 of 5 exams needed to become certified by APICS with a Certified Production Inventory Management (CPIM) designation. Explore the processes used to develop sales and operations plans and identify and assess internal and external demand and forecasting requirements. The course focuses on the importance of producing achievable master schedules that are consistent with business policies, objectives, and resource constraints.

Topics include:

- Demand Management
- Sales and Operations Planning
- Master Scheduling
- Measuring Business Performance
