PROGRAM OUTCOMES
Nursing Education (NURED)

“The graduate will:”

I. Synthesize knowledge from nursing, related sciences, and education to fully analyze, design, implement, and evaluate nursing care.

II. Select and implement appropriate advanced leadership skills and critical decision making in the provision of healthcare team coordination, and the oversight and accountability for care delivery and outcomes.

III. Appraise and recommend quality improvement methods, tools, performance measures, and standards to ensure patient safety.

IV. Integrate theory, evidence, clinical judgment, research, and interprofessional perspectives to improve patient outcomes.

V. Analyze current and emerging healthcare information systems and patient care technology to optimize patient safety, cost-effectiveness, and quality health outcomes.

VI. Interpret the effect of legal and regulatory processes, and ethical principles on nursing practice, healthcare delivery, and quality patient outcomes.

VII. Collaborate directly with other healthcare professionals to improve patient and population health outcomes.

VIII. Evaluate the effectiveness of health promotion and disease prevention interventions that affect individual and population-based health outcomes.

IX. Synthesize learning and teaching theories and principles to design, implement, and evaluate health education programs for individuals or groups in a variety of settings.
