EXECUTIVE SUMMARY

Scope and Methodology
This report includes data about the August 2012, December 2012, and May 2013 Bradley University undergraduate and graduate degree recipients. The study utilizes data from 94% of all Bachelor’s degree recipients and 83% of all advanced degree recipients. Data was collected via graduation fair surveys, online surveys, telephone and email solicitations, alumni records, social media research, and input from faculty, staff, and employers. Data collection began in August 2012 and concluded in December 2013.

Placement and Knowledge Rate
The Bradley University placement rate for the 2012-2013 undergraduate graduating class is 92%. This is greater than our five year average of 91%. The term “placement rate” is calculated by dividing the number of students who are employed, continuing their education, or pursuing neither of those options after graduation by the total number of students about whom we have information. We successfully contacted, surveyed, and/or researched 1,100 of those graduates which resulted in a 94% knowledge rate. The term “knowledge rate” defines the percent of graduates for which we have reasonable and verifiable information concerning the graduates' post-graduation career activities. This knowledge rate is considerably higher than the proposed national minimum knowledge rate of 65%.

Students
Ninety six percent of this graduating class used the services of the Smith Career Center while attending Bradley University. We provided 198 workshops for all students and 126 presentations to classes and groups during the 2012-2013 Academic year. Career Advisors met one-on-one with 1,904 students (unique contacts) for a total of 3,875 appointments during the Academic year via appointments (scheduled and walk-in), phone, and in depth emails. The Smith Career Center remained a top source of job leads for accepted positions when students utilized resources such as internships, job fairs, eRecruiting, and other web-based tools.

Experiential Learning
The Bradley University experiential learning rate for the 2012-2013 graduating class is 96%. This was calculated by tracking students’ participation in practical application opportunities such as: internships, co-ops, practica, study abroad, faculty-led research/projects, student organization leadership, and capstone/senior projects. For experiential learning, internships play a significant part. Of the 1,175 graduates, 84% (988) had a career-related experience, such as an internship. Graduates with experiential learning achieve a higher placement rate. Graduates with experiential learning had a 92% placement rate; graduates without experiential learning had an 81% placement rate.

Employers
Bachelor’s degree graduates were employed with 541 different employers in 31 states and 6 countries. The diversity found within this group is a benefit for our students. 416 different organizations attended our 2012-2013 job fairs. This compares favorably with our identified peer institutions that averaged 365 different organizations. Employers with a strong recruiting presence on campus include: AFN, LLC; American Red Cross; Auto-Owners Insurance Company; Caterpillar Inc.; CliftonLarsonAllen LLP; Exelon Corporation; Lend Lease, Inc.; NBC Universal Inc./The Olympics, New York & London; OSF Healthcare System; and PricewaterhouseCoopers LLC (PwC).

Standards and Protocols
The National Association of Colleges and Employers (NACE) is the preeminent national organization focused on the employment of the college educated. As such, it has a singular responsibility to the profession and the public to provide thought leadership on the relevant issues and trends affecting the college educated work force. The terminology, standards, and protocols proposed by NACE are utilized throughout this study.
